

Training & Education Center

Preparing our public health workforce!

Office of Human Resources, Utah Department of Health

Purpose

The Training and Education Center was established to support Utah's public health and healthcare workforce by 1) assuring the appropriate delivery of education and training in preparedness and a response to bioterrorism, disease outbreaks, and other public health threats and emergencies, 2) to increase access to professional development opportunities for Utah's Public Health workforce, and 3) to assure access to training and education through the effective use of technology.

Resources

The Training & Education Center is staffed by professionals with expertise in training needs assessment and evaluation, instructional design, instructional technology, distance learning, and training project management. Program staff are available to consult with you and assist in:

The following areas of the instructional design process:

- **Needs Analysis**
- **Instructional Design**
